Program Notes

New flex band arrangement by Clarence Barber, playable on any SSATB combination of woodwind, brass, or string players with optional percussion. Commissioned by the Madison Junior High Band in Abilene, Texas, conducted by Warren Faxton.

About the Composer

DR. FRANCIS MCBETH, born March, 1933, in Lubbock, Texas, was Professor of Music and Resident Composer at Ouachita University, Arkadelphia, Arkansas. The most outstanding of his awards have been the Presley Award at Hardin-Simmons University, the Howard Hanson Prize at the Eastman School of Music for his Third Symphony, recipient of an ASCAP Special Award each consecutive year from 1965 to the present (1996 at the time these notes were written), the American School Band Directors Association's Edwin Franko Goldman Award, elected Fellow of the American Wind and Percussion Artists by the National Band Association, Phi Mu Alpha Sinfonia's American Man of Music in 1988, Kappa Kappa Psi's National Service to Music Award, Midwest International Band and Orchestra Clinic's Medal of Honor in 1993, and Past President of the American Bandmaster's Association. Dr. McBeth was music director of the Arkansas Symphony in Little Rock and, in 1975, he was appointed Composer Laureate of the State of Arkansas by the Governor.

Performance Suggestions

An explanation is necessary about the percussion as to the long and short wooden blocks. These are to be two players, each playing pairs of wooden blocks three inches long, and two players, each playing pairs of wooden blocks six inches long. Cut these blocks out of just a regular two by four. If you have an abundance of percussionists, you could use six players instead of the four, but not more. If you happen to have a set of temple blocks and an extra player, have the person play both block parts on the lowest and highest temple blocks (most of the time they will be playing both temple blocks in unison rhythm).

The major rehearsal problem will be rushing in the percussion and clapping parts.

Be careful with young players on the timpani part where one taps with the wooden end of the stick on the shell of the large drums. If they observe the volumes indicated, it will not injure the drum, but they tend to get a little carried away.
